

Project Demo Planning

Date	12 July 2026
Team ID	[Your Team ID]
Project Name	HDI Predict – Human Development Index Prediction & Insights Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the HDI Predict project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the team and explain the problem: the need for a data-driven way to assess and compare human development across countries using life expectancy, education and income indicators.	2	[Team Member 1]
2	Dataset & Approach Overview	Explain the HDI dataset (life expectancy, mean & expected years of schooling, GNI per capita) and the ML approach used to train the HDI prediction model.	2	[Team Member 2]
3	Scenario 1 – Very High HDI Prediction	Live demo: enter indicator values for a country with high life expectancy, strong schooling and high GNI per capita; show the model predicting a Very High HDI classification.	3	[Team Member 1]
4	Scenario 2 – Development Gap Identification	Live demo: enter mid-range values representing an emerging economy; show the Medium HDI prediction and the highlighted areas (health, education, income) needing improvement.	3	[Team Member 3]
5	Scenario 3 – Development Intervention Assessment	Live demo: enter low-range values for life expectancy, education and income; show the Low HDI prediction and the developmental challenges flagged for policy intervention.	3	[Team Member 2]
6	Dashboard, Report Export & Closing	Showcase the analytics dashboard for trend/regional comparison, demonstrate exporting a summary report, and close with key takeaways from the project.	2	[Team Member 3]

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Set the context: why measuring human development beyond GDP matters, and what the HDI captures.
2	Solution Overview	Summarize the HDI prediction model, its inputs (life expectancy, schooling, GNI per capita) and the four-tier classification output.

Step	Activity	Notes
3	Live Feature Demonstration	Walk through all three scenarios — Very High, Medium and Low HDI predictions — plus the dashboard and report export.
4	Q&A Session	Address questions on model accuracy, data sources, and potential policy applications.
