Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Awareness	Stage 2 Input & Use	Stage 3 Analysis & Decision
Actions <i>What does the customer do?</i>	- Realises manual HDI calculation is slow and error-prone - Searches for an online HDI prediction tool - Lands on the HDI Predictor website	- Adjusts sliders for life expectancy, schooling years, and GNI - Loads a pre-built scenario (Very High / Medium / Low) - Reads the live HDI score and tier classification	- Reviews sub-index breakdown (health, education, income) - Reads the improvement recommendation for the weak dimension - Exports or shares the result for policy reporting
Touchpoint <i>What part of the service do they interact with?</i>	- Google / UNDP search results - Tool landing page / hero section - Navigation menu and CTA button	- Interactive sliders for four HDI indicators - Scenario preset buttons - Real-time HDI score display and tier badge	- Sub-index score cards with percentage breakdown - Improvement recommendation panel - Export to PDF / CSV / share link
Customer Thought <i>What is the customer thinking?</i>	- Is there a tool that does this automatically? - Will this give me an accurate HDI tier? - Can I trust the formula used here?	- Which indicator is dragging the score down most? - How does changing GNI shift the tier? - Does this match the UNDP published score?	- Which policy intervention will have the most impact? - How do I present this to the ministry? - Can I simulate what-if improvements?
Customer Feeling <i>What is the customer feeling?</i>	Curious but uncertain — hopeful that the tool will save time	Engaged and focused — enjoying the real-time feedback	Confident and satisfied — ready to act on the insights
Process Ownership <i>Who is in the lead on this?</i>	Product team (SEO, landing page design)	Frontend development team	Data analysis team and policy advisory team

Opportunities <i>How can we improve this stage?</i>	● Add a clear headline explaining the UNDP formula used ● Show sample output on the landing page to build trust ● Link to UNDP methodology documentation	● Highlight the lowest-scoring sub-index automatically ● Show tooltip explaining each indicator's valid range ● Add a comparison mode for two countries side by side	● Add a what-if simulation mode to project future HDI scores ● Generate a one-page PDF summary for ministry submission ● Allow multi-country comparison for regional benchmarking
